Recycled Beads Jablonex

are the sustainable answer to the world of glass beads.

We are proud to present a Unique new line of product.

We have put our minds together to obtain a recycled bead made out of recycled glass of bottles and jars mixed with our production glass.

Why?

We see a wasted planet in the verge of catastrophe.

After hundreds of years of glass bead making in Bohemia (Czech Rep), now we see our world being invaded by other products, similar, but not the same.

We have seen the glass beads factories closing down because of an uncontrolled and fierce competition.

We had to do something about this.

And we made it!

Check out our beautiful selection and wait for many more to come.

Selection Overview

Available Shapes

General info

CERTIFICATES

Our product is in compliance with REACH standards. All beads colours are lead free with the exception of 71000 and 71010. We provide REACH certificate on demand.

ENVIRONMENT

Jablonex® manufacturing facilities utilize the latest environmentally friendly production technology and meets all regulations. When used for their intended purpose all products are free of health hazards.

WARNING

Slight changes in colours are due to natural properties of glass unavoidable.

DIRECTIONS OF USE

Kindly take into account the specific properties of products: small beads ought to be kept away from kids (hazardous to swallow and to inhale). Larger glass products should be protected against breakage (danger of sharp pieces of glass)

COLOUR FASTNESS

Beads are colour fast when stored in a dry and dark place. When used for common garment and jewellery applications beads maintain the same colour.

OTHER IMPORTANT SPECIFICATIONS

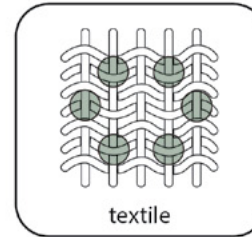

Colour range (including coatings) as per standard colour card issued by Jablonex® other colours upon request. Delivery subjected to order confirmation, for production check MOQ. Beads are delivered in standard packing.

STORAGE

The shelf life of beads will increase when stored in a dry and dark place.

Specific uses info

WASHING

Colour washing cycle with temperature up to 40°C (100F) and non-bleach washing liquid will not affect beads.

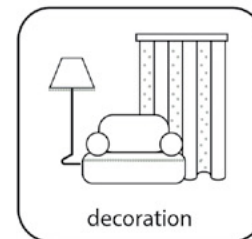

COSMETICS

Ordinary cosmetics do not affect the glass and surface treatment. The surface layer does not dissolve, Neither the glass nor the surface treatment chemically interacts with fabrics or the skin. Some coatings may be harmed in accessories like bracelets with high level of abrasion by contact with clothes and skin.

PERSPIRATION

When used for usual decorative purposes, beads are not negatively affected by perspiration. The surface treatment remains stable.

DECORATIVE PURPOSES

Beads are colour fast when in a dry and dark place. The constant exposure to the sun and humidity might produce changes in the colours and coatings applied to the surface of the beads.
